The theory is embodied in an address by Captain Silas Bent, of the American navy, at a recent meeting of the St Louis Historical Society-a theory to which he has given the name of "The Thermometric Gateway to the Pole." The publication of this theory, which, he tells us, is the result of thirty years study and exploration, has an eminently humane purpose, and is of no less importance than the actual saving of human life. To prevent further needless sacrifice of human life in the perilous attempts to again traverse the pathways which have been so often tried, and tried in vain, is the very worthy purpose. In untechnical lan guage we shall endeavor to explain That there is a passage at sometime call him a fool. The theory is based upon the immuta-

"The Wonders of Pompeii" is the latest volume of the Illustrated Library strange stemar cloudiers that neck the eight different congregations. One of Wonders published by Charles have been devoted to aid the progress hundred and twenty chapels are now have been devoted to aid the progress Scribner & Co. It is translated from the French Marc Monnier. The pages number two hundred and fifty and the illustrations twenty. The author has done what the bookseller at Naples pronounced impossible, viz: Produced a work on Pompeii which is 'small, portable, accurate, conscientious and

within everybody's reach.' After a brief history of the original city, stating that it was a place where the Romans were fond of living, and that Cæsar had a villa there, that it was a miniature Rome, and that it was partly shaken down by an earthquake in the year 63 B. C., the author proceeds to a description of the exhumed city and the discoveries made. One of the interesting discoveries has been bake-ovens with loaves of bread in them. One of those complete baker ies was found in which the grain is received from the owner and returned to him in the shape of bread ready baked, being ground and baked in the same establishment. We believe there present day, though there are baking establishments connected with mills. In this bakery, the troughs could still be recognized, the arch of the oven was

DR. C. W. ROBACK, Dear Sir:-Permit me to say in relation to your Scandinavian Blood Pills and Blood Purifier, that I have used several boxes and bottles, and have found their effects on my system to be all that is claimed for them in your advertisements. I have also seen the effects of your Pills upon a child four or five years old, in expelling worms from the bowels.—One dose given the child, confined to the bed, and apparently very sick, caused the worms to

come away from it in great numbers, and they were found crawling and scattered all about. The child thus relieved recovered immediately, and is now

well and hearty.

MRS. ALLEN'S

Hair Restorer & Zylobalsamum Are so uniformly grateful and beneficial, that they are with justice called the natural strengtheners of the human hair. They are two entirely separate and distinct preparations, not to be used together at one time.

Mrs. Allen's Bair Restorer Never fails to satisfy the most refined and cultivated. A guarantee goes with every bottle, that it will quickly restore gray or white hair to its original youthful beauty, gloss and color; after its use a few times the hair will grow thicker and stronger. It will stop its falling and induce a healthy and luxuriant growth. It is an exquisite hair dressing, agreeable, harmless and healthy. Entirely different from most other preparations for the hair, its composition and ingredients are nourishing, giving life and vigor to the Roots.

Mrs. Allen's Zylobalsamum

This exquisite preparation is free from any sediment, and is a toilet treasure. The urgent want of a simple Hair Dressing, for the youth of both sexes, first induced the manufacture of the Zylobalsamum, and the sale of it is perfectly immense, not only in this country, but in Europe.

EXTRACTS FROM A FEW LETTERS. EXTRACTS FROM A FEW LETTERS.
